**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3, 12, 14, 15, 17, and 18, drawn to a continuous casting method and apparatus.

Group II, claim(s) 9-11 and 16, drawn to an aluminum or aluminum alloy cast member and metal worked article.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the aluminum or aluminum alloy cast member and metal worked article of Group II (claims 9-11 and 16) lack technical features of the continuous casting method and apparatus of Group I (claims 1, 3, 12, 14, 15, 17, and 18), as the cast member and article of Group II (claims 9-11 and 16) includes a final solidification portion having relatively larger crystallized substances and located within a specified depth of the cast member, all of which are lacking in Group I. Furthermore, Group I includes the technical features of providing a casting wheel with a groove and endless belt while controlling the temperature of the

endless belt with a separate heating device from that of the heating device for the molten metal that solidifies to become the cast member, all of which are lacking in Group II. As a result of the lack of the same or corresponding special technical features, no single general inventive concept exists. Therefore, restriction is appropriate.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
